Subject index to volume 45

Analytical microscopy

Computer-assisted extrapolation method for absorption correction in quantitative X-ray microanalysis, *Horita, McCartney and Weiss* 45 (1992) 263

Influence of X-ray absorption on the spatial resolution of X-ray microanalysis of thin foils, *Schmitz and Van Cappellen* 45 (1992) 417

Cryomicroscopy

Invariant recognition of molecular projections in vitreous ice preparations, *Schatz and Van Heel* 45 (1992) 15

Limits of cryofixation as seen by Fourier transform infrared spectra of metmyoglobin azide and carbonyl hemoglobin in vitrified and freeze-concentrated aqueous solution, *Mayer and Astl* 45 (1992) 185

Radial mass density functions of vitrified helical specimens determined by scanning transmission electron microscopy: their potential use as substitutes for equatorial data, *Trachtenberg, Leonard and Tichelaar* 45 (1992) 307

Diffraction and optical diffraction

Direct phasing in electron crystallography: determination of layer silicate structures, *Dorset* 45 (1992) 5

Registry and UHV transmission electron diffraction of surfaces, *Marks* 45 (1992) 145

Intensities of surface diffraction spots in plan view, *Xu and Marks* 45 (1992) 155

Convergent-beam electron diffraction pattern of muscovite and its computer simulation, *Zhou and Möllenstedt* 45 (1992) 163

Electron crystallography at atomic resolution: ab initio structure analysis of copper perchlorophthalocyanine (*Erratum*), *Dorset, Tivol and Turner* 45 (1992) 165

Microdiffraction as a tool for crystal structure identification and determination, *Morniroli and Steeds* 45 (1992) 219

Sensitivity and accuracy of CBED pattern matching, *Bird and Saunders* 45 (1992) 241

SIMCON: a versatile software package for the simulation of electron diffraction contrast images of arbitrary displacement fields, *Janssens, Vanhellemont, De Graef and Van der Biest* 45 (1992) 323

Automated phase determination in electron crystallography: thermotropic phases of thiourea, *Dorset* 45 (1992) 357

Matrix description of dynamical HOLZ diffraction tested on the strained layer superlattice Si/GeSi, *Wang, Peng, Duan and Chu* 45 (1992) 405

Electron energy loss spectroscopy

Note on the energy lost by a charged particle specularly reflecting at a surface, *Barrachina and Gras-Marti* 45 (1992) 345

High resolution

Quantitative high-speed matching of high-resolution electron microscopy images, *Thust and Urban* 45 (1992) 23

High-resolution electron microscopy of 90° ferroelectric domain boundaries in $BaTiO_3$ and $Pb(Zr_{0.52}Ti_{0.48})O_3$, *Tsai, Khiznichenko and Cowley* 45 (1992) 55

High-resolution electron microscopy of quasi-amorphous materials, *Timsit, Waddington and Gallerneault* 45 (1992) 65

Single atom imaging in high-resolution UHV electron microscopy: Bi on Si(111) surface, *Haga and Takayanagi* 45 (1992) 95

On the iterative restoration of the exit plane wave function from defocus series in HREM, *Gribelyuk and Hutchison* 45 (1992) 127

Analytical description of image contrast in HRTEM and applications, *Geipel and Hohenstein* 45 (1992) 167

Phason-strain identification for quasicrystals by high-resolution electron microscopy, *Li, Pan, Huang, Hashimoto and Yokota* 45 (1992) 299

Holography

Electron holography in the study of the electrostatic fields: the case of charged microtips, *Matteucci, Missiroli, Muccini and Pozzi* 45 (1992) 77

Computer analysis of side-band holography in STEM, *Gribelyuk and Cowley* 45 (1992) 103

Determination of the imaging conditions in off-axis side-band STEM holography, *Gribelyuk and Cowley* 45 (1992) 115

Elsevier Science Publishers B.V.

Krakow 45 (1992) 269
Simulation and interpretation of STEM side-band holograms, *Konnert and D'Antonio* 45 (1992) 281
Theory of the point source electron microscope, *Kreuzer, Nakamura, Wierzbicki, Fink and Schmid* 45 (1992) 381

Image processing, 3D reconstruction
Invariant recognition of molecular projections in vitreous ice preparations, *Schatz and Van Heel* 45 (1992) 15
Quantitative high-speed matching of high-resolution electron microscopy images, *Thust and Urban* 45 (1992) 23
On the iterative restoration of the exit plane wave function from defocus series in HREM, *Gribelyuk and Hutchison* 45 (1992) 127
Convergent-beam electron diffraction pattern of muscovite and its computer simulation, *Zhou and Möllenstedt* 45 (1992) 163
Sideband holographic imaging of a tilt grain boundary to the 1.22 Å resolution level, *Krakow* 45 (1992) 269
Simulation and interpretation of STEM side-band holograms, *Konnert and D'Antonio* 45 (1992) 281
SIMCON: a versatile software package for the simulation of electron diffraction contrast images of arbitrary displacement fields, *Janssens, Vanhellemont, De Graef and Van der Biest* 45 (1992) 323

Imaging
Sideband holographic imaging of a tilt grain boundary to the 1.22 Å resolution level, *Krakow* 45 (1992) 269
Simulation and interpretation of STEM side-band holograms, *Konnert and D'Antonio* 45 (1992) 281

Methods and techniques
Device for direct writing and reading-out of information based on the scanning tunneling microscope, *Adamchuk and Ermakov* 45 (1992) 1
A method for observing cross-sectional views of biomembranes, *Sakata, Tahara, Morikawa, Fujiyoshi and Kimura* 45 (1992) 253
Computer-assisted extrapolation method for absorption correction in quantitative X-ray microanalysis, *Horita, McCartney and Weiss* 45 (1992) 263
Method of directly imaging the reconstruction on Au(111) and Au(100) by reflection electron microscopy, *Wang, Uchida and Lehmpfuhl* 45 (1992) 291
Method for detection of thermally activated element migration inside multilayer metallizations by means of electron microscopy, *Mändl, Zweck and Hoffmann* 45 (1992) 351
Automated phase determination in electron crystallography: thermotropic phases of thiourea, *Dorset* 45 (1992) 357
Simple method for determining the absolute sense of image rotation in a transmission electron microscope, *Nakahara and Cullis* 45 (1992) 365

New developments
Electron crystallography at atomic resolution: ab initio structure analysis of copper perchlorophthalocyanine (*Erratum*), *Dorset, Tivol and Turner* 45 (1992) 165
New STEM multisignal imaging modes, made accessible through the evaluation of detection efficiencies, *Jeanguillaume, Colliex, Ballongue and Tencé* 45 (1992) 205
Microdiffraction as a tool for crystal structure identification and determination, *Morniroli and Steeds* 45 (1992) 219
Sensitivity and accuracy of CBED pattern matching, *Bird and Saunders* 45 (1992) 241
Two-dimensional demonstration of Wigner phase-retrieval microscopy in the STEM configuration, *McCallum and Rodenburg* 45 (1992) 371
Theory of the point source electron microscope, *Kreuzer, Nakamura, Wierzbicki, Fink and Schmid* 45 (1992) 381

Particle optics, theory
Optical properties and axial aberration coefficients of the cathode lens in combination with a focusing lens, *Lenc and Müllerová* 45 (1992) 159
Theory of the point source electron microscope, *Kreuzer, Nakamura, Wierzbicki, Fink and Schmid* 45 (1992) 381

Reflection electron microscopy, reflection high-energy electron diffraction
Observation of ferroelectric domain boundaries in $BaTiO_3$ single crystals by reflection electron microscopy, *Tsai and Cowley* 45 (1992) 43
Method of directly imaging the reconstruction on Au(111) and Au(100) by reflection electron microscoopy, *Wang, Uchida and Lehmpfuhl* 45 (1992) 291
Note on the energy lost by a charged particle specularly reflecting at a surface, *Barrachina and Gras-Marti* 45 (1992) 345

tron images in the STEM, *Walsh* 45 (1992) 85
Computer analysis of side-band holography in STEM, *Gribelyuk and Cowley* 45 (1992) 103
Determination of the imaging conditions in off-axis side-band STEM holography, *Gribelyuk and Cowley* 45 (1992) 115
New STEM multisignal imaging modes, made accessible through the evaluation of detection efficiencies, *Jeanguillaume, Colliex, Ballongue and Tencé* 45 (1992) 205
Radial mass density functions of vitrified helical specimens determined by scanning transmission electron microscopy: their potential use as substitutes for equatorial data, *Trachtenberg, Leonard and Tichelaar* 45 (1992) 307
Two-dimensional demonstration of Wigner phase-retrieval microscopy in the STEM configuration, *McCallum and Rodenburg* 45 (1992) 371

Scanning tunneling microscopy

Device for direct writing and reading-out of information based on the scanning tunneling microscope, *Adamchuk and Ermakov* 45 (1992) 1
Scanning tunneling microscopy of an ionic crystal: ferritin core, *Yang, Takeyasu, Somlyo and Shao* 45 (1992) 199
STM study of single crystal graphite, *Wang, Moskovits and Rowntree* 45 (1992) 337

Specimen preparation

Preparation of TEM samples from compound semiconductors by chemomechanical polishing, *Sabinina and Gutakovsky* 45 (1992) 411
aries in $BaTiO_3$ single crystals by reflection electron microscopy, *Tsai and Cowley* 45 (1992) 43
High-resolution electron microscopy of 90° ferroelectric domain boundaries in $BaTiO_3$ and $Pb(Zr_{0.52}Ti_{0.48})O_3$, *Tsai, Khiznichenko and Cowley* 45 (1992) 55
Single atom imaging in high-resolution UHV electron microscopy: Bi on Si(111) surface, *Haga and Takayanagi* 45 (1992) 95
Registry and UHV transmission electron diffraction of surfaces, *Marks* 45 (1992) 145
Intensities of surface diffraction spots in plan view, *Xu and Marks* 45 (1992) 155
Method of directly imaging the reconstruction on Au(111) and Au(100) by reflection electron microscoopy, *Wang, Uchida and Lehmpfuhl* 45 (1992) 291
STM study of single crystal graphite, *Wang, Moskovits and Rowntree* 45 (1992) 337
Note on the energy lost by a charged particle specularly reflecting at a surface, *Barrachina and Gras-Marti* 45 (1992) 345
Method for detection of thermally activated element migration inside multilayer metallizations by means of electron microscopy, *Mändl, Zweck and Hoffmann* 45 (1992) 351
